---

- ✓ An IT professional with 8+ **years** of experience in **software engineering.**
- ✓ **Working as Senior Software Developer in Wolters Kluwer Since Apr 2014**
- ✓ **Worked** as **Associate Projects** in **Cognizant Technologies (India) from Apr 2010 to Apr 2014.**
- ✓ **B.E (Electronics & Telecomm Engg.) from Govt. College of Engg Amravati, M.H (Amravati Univ.) In 2009 (70.0%)**
- ✓ Knowledge of Agile software development cycle, impact analysis, planning, implementation of specific feature, performance measurement and quality.
- ✓ Certified SAFe Practitioner (SP, 2017).
- ✓ An effective communicator with strong logical, problem solving & organizational abilities

## CORE EXPERTISE

- Software Design & Implementation/Integration
- Agile Software Development Lifecycle (SDLC)
- Hands on Experience in – Development of C#.Net,ASP.net MVC, Web API, SQL Server JavaScript, Angular JS, Azure PaaS, Cognitive Services, Service Fabric, Microservices, Azure Storage, NoSQL DB, VSTS, CI-CD DEV OPS, Service Bus, Event Hubs PowerShell.
- Track record of being trusted with the critical and sensitive deliverables and always accepting the challenge and succeeding

## TECHNICAL EXPERTISE

| | |
|---|---|
| • Programming Languages | C#.Net, PowerShell |
| • Web Development | HTML, JavaScript , Angular JS 1X, Web API, Azure PaaS, Service Fabric, MVC (Mid) |
| • Database | SQL Server, Oracle 11g |
| • Tools | TFS, GIT, VSTS |

## CERTIFICATIONS

**Agile Certification**
- Certified SAFe Practitioner (SP, 2017)

**Microsoft Certification in .Net**
- Application Foundation .NET Framework 2.0 ( Y. 2012)
- ASP .NET 3.5 Web Development ( Y. 2012)

**Business Certification in Insurance Domain**
- AAPA 273(Annuities Product and Principles)  ( Y. 2012)

## EXPERIENCE

**Organization:  Wolters Kluwer**                                              *Jan 2016 – Till Date*

| | |
|---|---|
| Title | SSO and Platform Services. |
| Technical Exposure (Intermediate) | C#.Net, SQL Server, Angular JS(1x), Azure PaaS, Service Fabric ,Microservices, Web API, Bootstrap, MVC |
| Team Size | 5 |
| Role | Senior Software Developer |

**Project Highlights**

Development of single sign-on (Identity Server) and access control for modern web applications and APIs using protocols like OpenID Connect and OAuth2.

Identity Server is designed as an OWIN/Katana component, it supports a wide range of clients like mobile, web, SPAs and desktop applications and is extensible to allow integration in new and existing architectures.

Worked on Azure storages, NoSQL DB, Redis Cache, Cognitive Services, CI-CD Setup, VSTS, Service Bus, Event Hubs etc.

**Organization:  Wolters Kluwer**                                                *Apr' 2015 – Jan'2016*

Title                       SSO and Licensing Services.
Technical Exposure          C#.Net 4.5, SQL Server, WCF, Angular JS, MVC, Web API
Team Size                   5
Role                        Senior Developer

**Project Highlights**
To build & maintain a concrete SSO module to support vast number of products available under the software package.
Enhancement and maintenance of existing application and building common services to support open integration of the product.
Design and develop new tools to improve the performance and usability.

---

**Organization:  Cognizant Technology Solutions**                               *Jan' 2013 - Apr' 2015*

Title                       Self on-Boarding & Access Management Portal
Technical Exposure          C#.Net, ASP.NET, SQL, Oracle, WCF, JavaScript, jQuery, Oracle 11g, SSIS, SSRS
Team Size                   6
Role                        Senior Developer

**Project Highlights**
This project was a part of pure SDLC development work. This project focuses on automating the access management and fulfills quality audit requirements. It caters to wide range for applications, platforms and database access management and on-boarding users.

---

**Organization:  Cognizant Technology Solutions**                               *Mar' 2012 – Dec' 2012*

Title                       Risk Management Reporting Website
Technical Exposure          C#.Net, ASP.NET, WCF, SSIS, SSRS, Oracle, jQuery and JavaScript
Team Size                   3
Role                        Developer

**Project Highlights**
This project was a part of development work to provide a website where all of the deployed reports can be access and managed very easily. Website is designed in such a way that for any future change in reports, the code changes are minimal or configurable.

---

**Organization:  Cognizant Technology Solutions**                               *Jun' 2011 – Feb' 2012*

Title                       Auto File Converter Framework.
Technical Exposure          C#.Net, SQL Server, JavaScript, jQuery, XML
Team Size                   3
Role                        Developer

**Project Highlights**
To design a unique framework which can be used to convert any file type/format to a predefined file format/type.
This project was a part of development work to provide a generic solution to all kind of files and different file formats.

---

**Organization:  Cognizant Technology Solutions**                               *Sep' 2010 – Dec' 2011*

Title                       Batch Architecture.
Technical Exposure          C#.Net, SQL, Perl
Role                        Trainee Team Member

**Project Objective**
Batch process [Perl scripts] that are running on server need to analyzed and then reArch according future plans. And the migration of old ASP website to ASP.Net version 2.0
